## SECTION 4: First Aid Measures

### 4.1 Description of First Aid Measures

<b>Eye Contact:</b>	Check for and remove any contact lenses. Immediately flush eyes with running water for at least 10 minutes, keeping eye lids open. Do not neutralize with chemical agents. Get medical attention if irritation occurs.
<b>Skin Contact:</b>	When in contact with skin, remove contaminated clothing. Wipe away excess material with dry towel. Then wash affected areas with plenty of water, and mild soap if available, for several minutes. Do not attempt to neutralize with chemical agents. Get medical attention if irritation occurs.
<b>Inhalation:</b>	Immediately leave the contaminated area, take deep breaths of fresh air.
<b>Ingestion:</b>	Wash out mouth thoroughly with water. Drink plenty of water. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person. In severe cases obtain medical attention.

## SECTION 5: Firefighting Measures

### 5.1 Extinguishing Media

<b>Suitable:</b>	Water fog, dry chemical powder and carbon dioxide foam
<b>Unsuitable:</b>	No information available

### 5.2 Special Fire Fighting Procedures

Use water spray to cool nearby containers and structures exposed to fire. Containers can build up pressure if exposed to heat (fire). Fire involving large amounts of material should not be approached because individual containers may rupture abruptly causing "fireball" effect.

### 5.3 Unusual Fire Fighting Hazards

No unusual fire hazards are known.

## SECTION 6: Accidental Release Measures

### 6.1 Personal Precautions

Avoid breathing vapors, mist or gas. Ensure adequate ventilation.

### 6.2 Environmental Precautions

**Water Spill:** Avoid runoff into sewers and ditches which lead to waterways.

**Land Spill:** Soak up with absorbent. Shovel up and place in a waste container.

### 6.3 Methods for Cleaning Up

Stop spill at source. Dike area of spill to prevent spreading. Pump liquid to salvage tank. Absorb liquid on solid absorbent material and shovel into containers. Prevent run-off to sewers, streams or other bodies of water. Wash floor with hot soapy water and rinse with hot water to prevent slipping.

## SECTION 7: Handling and Storage

### 7.1 Precautions for Safe Handling

Use gloves and wear goggles when handling. Keep away from heat, sparks and flame. Never use pressure to empty drums. Handle in accordance with good industrial hygiene and safety.

### 7.2 Conditions for Safe Storage

This product must be stored in the manufacturer's original sealed container. The product must be stored under sheltered and well-ventilated warehouse; not exposed to moisture, or direct sunlight. The product must be stored in a place where temperature does not exceed 30 degrees centigrade. Deviation from the above condition may affect the stability of the product.

## SECTION 8: Exposure Controls/Personal Protection

### 8.1 Control Parameters

#### Exposure Limits

Component Name	CAS #	OSHA PEL	ACGIH TLV
Isopropyl Myristate	110-27-0	Not Established	Not Established

**Engineering Controls:** Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of the workday.

**Monitoring:** Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

## 8.2 Personal Protective Equipment

**Eye Protection:** Safety glasses with side-shields conforming to EN166 use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) and to EN1666 (EU).

**Skin Protection:** Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable guidelines and good laboratory practices. Wash and dry hands.

**Respiratory Protection:** Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14397) respiratory cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirator and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
